

TOC and TN_b Analyzer

Year of Purchase – 2015

Cost – Rs. 37.03 Lac

The modular versatility of the multi N/C series permits individual adaptation to your applications. Multiple automation options, various nitrogen detectors, and several solids modules, partly with automation option, for TOC determination in soil, sediment, waste materials, and more are available. multi N/C is versatile, reliable, and easy to use, guarantees maximum operating time and low running costs.

- Focus Radiation NDIR detector – Highest radiation density for highest sensitivity and precision
- VITA Flow Management System – Continues to work where classical TOC analyzers reach their limits
- Easy Cal – Calibration has never been so easy
- High-power long-life UV reactor – Convincing performance in wet chemical oxidation

Specifications

Features	Specifications
Measuring range [mg/L] TC/TOC/NPOC/TIC	0–30,000
Measuring range [mg/L] TN _b (ChD)	0–10,000
Measuring range [mg/L] TN _b (CLD)	0–20,000
Measuring range [mg] abs. solid TC/TOC	0–500
